VPAT™

Voluntary Product Accessibility Template®

Version 1.3

The purpose of the **Voluntary Product Accessibility Template**, or **VPAT™**, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial "Electronic and Information Technology" products and services with features that support accessibility. It is assumed and recommended that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., "equivalent facilitation." The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

Date: 05/22/2018
Name of Product: QGenda

Section 1194.22 Web-based Internet information and applications – Detail

VPAT™

Voluntary Product Accessibility Template®

Criteria	**Supporting Features**	**Remarks and explanations**
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Yes, our interface supports text equivalents for non-text elements	
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Yes, our software doesn't prevent native capabilities of web browser	
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Yes, all information conveyed with color is also available without color	
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Yes, our documents are in a standard format readable without a style sheet	
(e) Redundant text links shall be provided for each active region of a server-side image map.	Yes, our software doesn't utilize image maps	
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Yes, our software doesn't utilize image maps	
(g) Row and column headers shall be identified for data tables.	Yes, row and column headers are identified for data tables	
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Yes, structure of markup used in our software associates data cells with header cells	
(i) Frames shall be titled with text that facilitates frame identification and navigation	Yes, frames are titled with text for identification and navigation	
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Yes, our software doesn't interfere with web browser or operating system capabilities	
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Yes, a text-only page is provided by our software	
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the	Yes, pages utilizing scripting languages do not interfere with Assistive Technology	

script shall be identified with functional text that can be read by Assistive Technology.		
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Yes, our software doesn't require applets, plug-ins, or other applications to be present	
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Yes, our software doesn't interfere with Assistive Technology	
(o) A method shall be provided that permits users to skip repetitive navigation links.	Yes, our software is easily navigated	
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Yes, users are alerted and given sufficient time for timed responses	

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.
